

Program: ECE Faculty/College: TGGS
Degree Level: Master

Course 090245350

Efficient Algorithms

King Mongkut's University of Technology North Bangkok
The Sirindhorn International Thai-German Graduate School of Engineering
Electrical and Computer Engineering Program

Section 1: General Information

1.	Course code and o	ourse title							
	090245350	Efficient Algo	rithms						
2.	Total credits								
	3 credits	□ (2-2-5)	☑ (3-0-6)	□ (3-0-9)	□ (2-3-7)				
3.	Curriculum and co	urse category	:						
	Curriculum:	Master of En	gineering in Ele	ectrical and Compu	iter Engineering				
	Course catego	ry: Requi	Required Courses						
		Cours	se category:	Required Course	es				
		□Со	re Course		☐ Specific Cor	e Course			
		□ Ind	ustrial Internsh	ip	☐ Master The	sis			
		Electi	ve Courses						
		☑ Ge	eneral Elective	☐ Specific Elect	ive □ Oth	er Elective			
4.	Course coordinato	or/ Instructors							
	Course Coordi	nator:							
	Instructor(s):	Dr.re	r.nat. Ekkapot (Charoenwanit					
5.	Semester/ year of s	study							
	☑ Semester 1	(Aug. to Dec.)	☐ Semester	2 (Jan. to May)	Academic Yea	r: 2021			
6.	Pre-requisite (if an	y)							
	☑ No	□ Ye	s, please provi	de:					
7.	Co-requisites (if ar	ny)							
	☑ No	□ Ye	s, please provi	de:					
8.	Venue of study								
	Lecture Day/Ti	me: Thurs	re: Thursdays at 13.00-16.00						
	☐ On-site:	Lecture Roon	e Room No.: Floor:						
		☐ TGGS, KM	IUTNB 🗆 I	Faculty of Enginee	ring, CU	□ RWTH			
	☑ Online*:	Teaching Me	dia: ☑ I	Microsoft Teams	☐ Google Me	et			
				oom	□ Webex				

Faculty/College: TGGS

	□ Other (specify)
9. Information	for quality assurance in education
This co	ourse shows evidence of:
	Development of implementation from previous practices, e.g. the improvement of
	class teaching, course content, content classification and methods used for learning
	assessment
	Involvement from professional bodies/ external agencies in instruction; thus
	Enhancing student academic and professional experiences
$\overline{\checkmark}$	Integration of research or creative activities with instruction; use of research-based
	learning management; knowledge management practices for learning improvement
	Integration of academic services and course implementation
	Combination of cultural heritage preservation efforts into instruction or student
	activities

10. Date of latest revision:

28th July 2021

Section 2: Course Description and Implementation

1. Course Description

Asymptotic Notation: Big O, Big Omega, Big Theta. Proof Techniques: Direct Proof, Proof by contradiction, Proof by contrapositive, Proof by induction. Sorting: Bubble sort, Selection sort, Insertion sort, Heap sort, Merge sort, Quicksort. Searching algorithms: Linear search, Binary search. Graph Algorithms: Minimum Spanning Tree, Breadth-first search, Depth-first search, Topological Sorting, Cycle Detection, Bellman-Ford algorithm. Dijkstra's algorithm, Floyd-Warshall algorithm, Johnson's algorithm. Data structures: List, Array, Stack, Queue, Hash table, Binary tree, Heap, Priority Queue. Algorithm paradigms: Divide-and-Conquer, Greedy algorithm, Dynamic programming. Computational complexity theory: Theory of NP-completeness. Approximation algorithms. State-Space Search: Brute-Force Search, Backtracking, Branch & Bound. Randomized algorithms.

2. Number of hours per semester

Lecture	Practice	Self-study
45 hours/ semester	30 hours	75 hours/ semester
(3 hours/week*)	(2 hours/week*)	(5 hours/week*)

Remark: * Based on 15 weeks of lecture

Course Category:	✓ Lecture	☑ Practice	□ Laboratory
Course Evaluation:	☑ A-F	□ S/U	□Р

Faculty/College: TGGS

Remark: 1. Guidelines according to Bloom's Taxonomy is available at https://courses.dcs.wisc.edu/design-teaching/PlanDesign_Fall2016/2-Online-Course-Design/2_Learning-Objectives-Alignment/6_objectives_blooms-taxonomy.html

Faculty/College: TGGS

2. For the master level course, CLOs should be "apply" and "analyze" or possibly consider the doctoral CLOs "evaluate" and "create". "Remember" and "Understand" are for the undergraduate level courses, however, they can be implemented only at the beginning of the course.

- 3. CLOs can be defined as many as appropriate for the course.
- 5. The mapping between Expected Learning Outcomes (ELOs) from the curriculum and Course Learning Outcomes (CLOs)

Table 5.1 ELOs-CLOs Consistency (for a subject-specific course/ a specific curriculum)

Remark: All ELOs and ELOs for the course (highlighted row) are as written in the Official Approved Curriculum.

ELOs/CLOs consistency	CLO 1	CLO 2	CLO 3	CLO 4	CLO 5
ELO1	✓	✓	✓	✓	
ELO2	✓	✓	✓	✓	
ELO3	✓	✓			✓
ELO4	✓	✓			✓
ELO5					
ELO6					
ELO7					
ELO8					
ELO9					
ELO10					

Table 5.2 Mapping desirable characteristics of KMUTNB graduates and CLOs (for non-specific courses designed for various curriculums)

Consistency between desirable characteristics of KMUTNB Graduates- CLOs	CLO 1	CLO 2	CLO 3	CLO 4	CLO 5
Professional credentials with critical thinking skills	√	√	✓	✓	✓
2. Integrity and social responsibility					
Innovative and technopreneur mindset	√	✓			√
4. Global Competence	✓	✓			✓

Faculty/College: TGGS

Section 3: Student Improvement in relation to Course Learning Outcomes (CLOs)

Organizing learning to develop skills/ knowledge; evaluation of CLOs in accordance with the ones identified in Section 2.4

Course Learning	Teaching Methods	Evaluation Methods
Outcomes (CLOs)	compliant with CLOs	compliant with CLOs
CLO 1	Lectures	Assignment evaluation
	Examples	 Assessment of assigned
	In-class exercises	exercises
	 Individual assignments 	• Exams****
01.0.0	Leatons	A
CLO 2	• Lectures	Assignment evaluation
	• Examples	Assessment of assigned
	In-class exercises	exercises
	Individual assignments	• Exams****
CLO 3	• Lectures	Assignment evaluation
	Examples	Assessment of assigned exercise
	 In-class exercises 	• Exams ****
	 Individual assignments 	
	Supervision sessions	
CLO 4	• Lectures	Assignment evaluation
	Examples	Assessment of assigned exercise
	In-class exercises	• Exams****
	Individual assignments	
	Supervision sessions	
CLO 5	Lectures	Assignment evaluation
	Examples	Assessment of assigned exercise
	In-class exercises	• Exams****
	Individual assignments	
	Supervision sessions	

Remark: * Lecture on the concept of the topic is introduced with basic or fundamental definitions, visualization, and correlations. For the complicated equation, the derivation from the basic laws can be shown to students. So, the students do not memorize the equations but understand the basic concept and basic equation. The lecturer will introduce the advanced

Faculty/College: TGGS

and new concepts, technologies, and findings to students from publications such as journals and websites and from the research and industrial experiences.

** Active learning by asking questions related to the topic in the lecture and encouraging the students to respond to the questions. If the students cannot respond with answers, then the lecturer will give some guidance until the students can respond.

*** Quiz in the closed-book format on the basic concepts and equations with simple problem solving to evaluate their learning. The solution will be given to students after grading, so they can identify their mistakes and weakness.

**** Exam on the basic concepts and equations with simple problem-solving in the closed-book format as a review, whereas the complicated/integrated problem solving will be worked in the open-book format.

Section 5 Teaching/Learning Resources

Textbooks and materials

- 1. E. Charoenwanit. Efficient Algorithms (Presentation Slides)
- 2. Cormen, T. H., & Cormen, T. H. 2001. Introduction to algorithms. Cambridge, Mass: MIT Press.
- 3. Jon Kleinberg and Eva Tardos. 2005. Algorithm Design. Addison-Wesley Longman Publishing Co., Inc., USA.
- 4. Anany V. Levitin. 2002. Introduction to the Design and Analysis of Algorithms. Addison-Wesley Longman Publishing Co., Inc., USA.

Section 6 Course Evaluation and Improvement

1. Course evaluation by students

The students will have an opportunity to evaluate the effectiveness of the course in the form of paper-based surveys and group interviews at the end of each semester. The results of the survey and the interview including the grading will be reviewed by the curriculum committee to evaluate the course's effectiveness.

2. Strategies for assessing learning management

The students will have an opportunity to evaluate the teaching in the form of paper-based surveys and group interviews at the end of each semester. The results of the survey and the interview including

Faculty/College: TGGS

the grading will be reviewed by the curriculum committee to evaluate the teaching. The lecturer will be informed of the evaluation for future improvements.

3. Improvement schemes of course implementation

The evaluation from the students including the grading will be submitted to the curriculum committee for reviewing and brainstorming to improve the teaching of each course. Comments and suggestions given by the curriculum committee will be informed to the responsible lecturer of each course.

4. Verification of students' learning outcomes, referred to OBE 2 and 3

The grading of this course will be evaluated and reviewed by the Department meeting and the TGGS executive board meeting in order to verify its appropriateness before the final approval.

5. Course review and improvement plans

The results of the grading evaluation and student evaluation will be submitted to the curriculum committee for reviewing and brainstorming to improve the effectiveness of the offered courses. Comments and suggestions will be informed to the responsible lecturer of each course.
