4. Course Learning Outcomes (CLOs): Students should be able to:

CLO 1. Broaden their horizons on recent research topics in the fields of electrical and power engineering, computer engineering, communications engineering, and smart grid engineering.

CLO 2. Improve oral and written communication skills.

CLO 3. Understand and discuss research topics

Remark: 1. Guidelines according to Bloom's Taxonomy is available at https://courses.dcs.wisc.edu/design-teaching/PlanDesign_Fall2016/2-Online-Course-Design/2_Learning-Objectives-Alignment/6_objectives_blooms-taxonomy.html

2. For the master level course, CLOs should be "apply" and "analyze" or possibly consider the doctoral CLOs "evaluate" and "create". "Remember" and "Understand" are for the undergraduate level courses, however, they can be implemented only at the beginning of the course.

3. CLOs can be defined as many as appropriate for the course.

5. The mapping between Expected Learning Outcomes (ELOs) from the curriculum and Course Learning Outcomes (CLOs)

Table 5.1 ELOs-CLOs Consistency *(for a subject-specific course/ a specific curriculum)*

Remark: All ELOs and ELOs for the course (highlighted row) are as written in the Official Approved Curriculum.

4. Global Competence	✓	✓	✓

Section 3: Student Improvement in relation to Course Learning Outcomes (CLOs)

Organizing learning to develop skills/ knowledge; evaluation of CLOs in accordance with the ones identified in Section 2.4

Course Learning Outcomes (CLOs)	Teaching Methods compliant with CLOs	Evaluation Methods compliant with CLOs
CLO 1	<ul style="list-style-type: none"> Lectures Examples Individual assignments Supervision Session 	<ul style="list-style-type: none"> Short Essays Class Participation Class Attendance
CLO 2	<ul style="list-style-type: none"> Lectures Examples Individual assignments Supervision Sessions 	<ul style="list-style-type: none"> Short Essays Class Participation
CLO 3	<ul style="list-style-type: none"> Lectures Examples Individual assignments Supervision Sessions 	<ul style="list-style-type: none"> Short Essays Class Participation

*Remark: * Lecture on the concept of the topic is introduced with basic or fundamental definitions, visualization, and correlations. For the complicated equation, the derivation from the basic laws can be shown to students. So, the students do not memorize the equations but understand the basic concept and basic equation. The lecturer will introduce the advanced and new concepts, technologies, and findings to students from publications such as journals and websites and from the research and industrial experiences.*

*** Active learning by asking questions related to the topic in the lecture and encouraging the students to respond to the questions. If the students cannot respond with answers, then the lecturer will give some guidance until the students can respond.*

**** Quiz in the closed-book format on the basic concepts and equations with simple problem solving to evaluate their learning. The solution will be given to students after grading, so they can identify their mistakes and weakness.*

***** Exam on the basic concepts and equations with simple problem-solving in the closed-book format as a review, whereas the complicated/integrated problem solving will be worked in the open-book format.*
