

Assoc. Prof. Dr. Saiprasit Koetniyom

รองศาสตราจารย์ ดร. สายประสิทธิ์ เกิดนิยม

Collaboration:

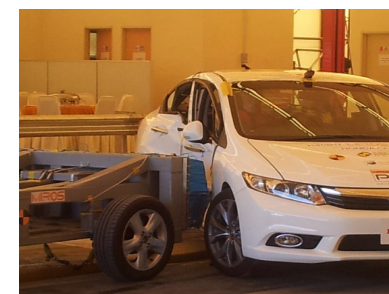

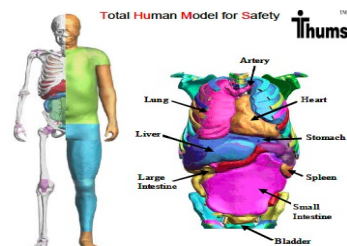

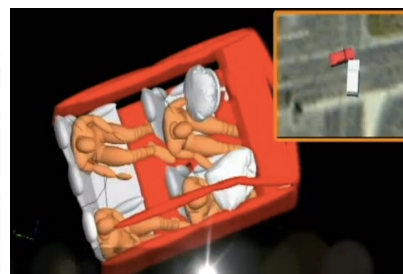

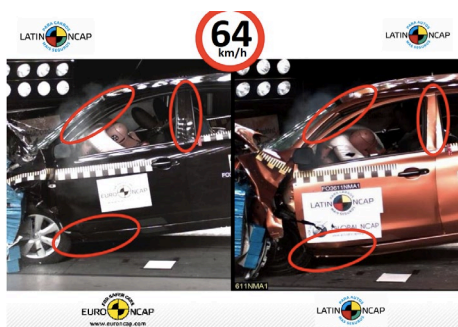

Research Area:

- Safety Protection and Design for Road Users
- Vehicle and Component Assessment
- Crash Test Simulation
- Vehicle Accident Reconstruction
- Vehicle Standard Regulations

Research Explanation:

To protect road users, vehicle and component should be designed through vehicle and component simulation. The simulation or vehicle testing normally obtains from accident reconstruction. Thus, vehicle and component should be assessed under standard regulation and accident scenerios.
