CLO 1. Explain the theoretical concepts in the followings:

- Machine vision hardware components
- Image forming and Camera model
- Basic image processing and enhancement
- Feature extraction and detection
- Multiview imaging

Program: **ECE**  
Degree Level: **Master**

Faculty/College: **TGGS**

**CLO 2.** Analyze and employ machine vision solutions suitable to the selected engineering problems.

Remark: 1. Guidelines according to Bloom's Taxonomy is available at [https://courses.dcs.wisc.edu/design-teaching/PlanDesign\\_Fall2016/2-Online-Course-Design/2\\_Learning-Objectives-Alignment/6\\_objectives\\_blooms-taxonomy.html](https://courses.dcs.wisc.edu/design-teaching/PlanDesign_Fall2016/2-Online-Course-Design/2_Learning-Objectives-Alignment/6_objectives_blooms-taxonomy.html)

2. For the master level course, CLOs should be "apply" and "analyze" or possibly to consider the doctoral CLOs "evaluate" and "create". "Remember" and "Understand" are for the undergraduate level courses, however, they can be implemented only at the beginning of the course.

3. CLOs can be defined as many as appropriated for the course.

## 5. The mapping between Expected Learning Outcomes (ELOs) from the curriculum and Course Learning Outcomes (CLOs)

**Table 5.1 ELOs-CLOs Consistency** (for a subject-specific course/ a specific curriculum)

ELOs/CLOs consistency	CLO 1	CLO 2
ELO1	✓	
ELO2		
ELO3		
ELO4		
ELO5		
ELO6		✓
ELO7		
ELO8		
ELO9		

Remark: All ELOs and ELOs for the course (highlighted row) are as written in the Official Approved Curriculum.

**Table 5.2 Mapping desirable characteristics of KMUTNB graduates and CLOs** (for non-specific courses designed for various curriculums)

Consistency between desirable characteristics of KMUTNB Graduates- CLOs	CLO 1	CLO 2

3. Innovative and technopreneur mindset		
4. Global Competence		

### Section 3: Student Improvement in relation to Course Learning Outcomes (CLOs)

Organizing learning to develop skills/ knowledge; evaluation of CLOs in accordance with the ones identified in Section 2.4

Course Learning Outcomes (CLOs)	Teaching Methods compliant with CLOs	Evaluation Methods compliant with CLOs
CLO 1	<ul style="list-style-type: none"> <li>● Lecture*</li> <li>● Active learning**</li> <li>● Individual and/or group assignment</li> <li>● Selected topics chosen by students</li> </ul>	<ul style="list-style-type: none"> <li>● Assignment evaluation</li> <li>● Exam****</li> </ul>
CLO 2	<ul style="list-style-type: none"> <li>● Case studies, project-based learning (individual/group)</li> <li>● Group discussions</li> </ul>	<ul style="list-style-type: none"> <li>● Joint evaluation of assigned tasks</li> </ul>

Remark: \* Lecture on the concept of the topic is introduced with basic or fundamental definitions, visualization and correlations. For the complicated equation, the derivation from the basic laws can be shown to students. So, the students do not memorize the equations but understand the basic concept and basic equation. The lecturer will introduce the advanced and new concepts, technologies, and findings to students from publications such as journals and websites and from the research and industrial experiences.

\*\* Active learning by asking questions related to the topic in the lecture and encouraging the students to response to the questions. If the students cannot response with answers, then the lecturer will give some guidance until the students can response.

\*\*\* Quiz in the closed-book format on the basic concepts and equations with simple problem solving to evaluate their learning. The solution will be given to students after grading, so they can identify their mistakes and weakness.

\*\*\*\* Exam on the basic concepts and equations with simple problem solving in the closed-book format as a review, whereas the complicated/integrated problem solving will be worked in the open-book format.
